FMJ T32 DAB/FM/AM tuner

- Combined DAB, FM-RDS, AM & Sirius radio tuner*
- Attractive easy-to-read VFD graphics display
- DAB & DAB+ coverage for band III and L-band
- iPod interface for HiFi systems using rDock/rLead
- Discrete audiophile FM/AM tuner circuitry
- 100 presets, randomly assignable to any band
- Audiophile design using a high-end 24-bit Wolfson DAC
- Toroidal transformer based powers supply
- Full remote control via RS232 or IR

New combined DAB/FM/AM/Sirius ready tuner with iPod support

Having designed and manufactured radio tuners since the late 1970s Arcam has a wealth of experience in delivering high performance from radio broadcasts. The new FMJ T32 builds on this foundation, using state-of-the-art technologies to deliver the very best radio quality from DAB, FM, AM and Sirius Satellite broadcasts (DAB and Sirius reception market dependent).

To ensure the very best sound quality the T32 uses Arcam's audiophile methodology. For DAB, digital to analogue conversion uses the Wolfson 8740 from Arcam's award winning DVD players. All circuitry is fed from a toroidal power transformer and multiple low noise regulated dc power supplies with components mounted on double-sided fibreglass PCBs. Station selection is via presets or the large front panel knob. The large, clear VFD display has scrolling text and is easily read from any angle or in any light condition.

A bespoke iPod interface is also included in the T32 allowing full integration of compatible iPods with any high performance music system. Using the Arcam rDock or rLead full control of the iPod is delivered from the remote handset along with pristine audio quality.

In addition to its class-leading audio performance, the T32's connectivity, control features and multi-platform reception are state of the art. If not connecting an iPod the RS232 control input make the T32 a perfect radio tuner for custom installations using Crestron or AMX style system controls. For simpler systems the unit features an IR jack input on the rear panel plus a fully featured system remote handset.

The T32 is the perfect partner for Arcam FMJ stereo and AV systems and is available in black or silver finish.

Available Q4 2008 - Price TBA

**Sirius Ready, Requires SiriusConnect™ tuner module. North America only.*

FMJ T32 DAB/FM/AM tuner

Key Features of the T32 Radio Tuner

Radio tuner compatibility

- DAB (market dependent) with band III and L-band reception
- DAB+ compatible for next-generation broadcasts (where available)
- Discrete AM/FM tuner with switchable Europe/North America de-emphasis and tuning increments
- Sirius-Ready for use with a SiriusConnect™ Home Tuner for receiving Sirius satellite radio (market dependent)

Digital to Analogue section

- Audiophile-quality Wolfson 8740 DAC
- Ultra high performance Burr Brown OPA2134 output op-amps

Connectivity

- Two pairs of RCA phono outputs for multi room use or direct recording
- Infra red control input (3.5mm jack)
- RS232 control socket for rDock/rLead connection to iPod (with accompanying RCA phono input sockets) or for RS232 remote control

Power supply

- Toroidal mains transformer
- Separate, high capacity power supplies for analogue and digital sections
- Switchable mains power inlet 110-120v / 220-240v

General

- Supplied with CR90 system remote control
- All gold plated output connectors
- Large, clear 128x18 pixel VFD display
- Size – 430mm (17") wide, 290mm (11.5") deep, 85mm (3.3") high
- Weight 5.3kg (11.7lbs) nett, 6.8kg (15.0lbs) packed
